

Swat team - investigation of cleaning problems

Cleaning Innovation offers a team of experts who together with you solve your urgent cleaning problems.

It sometimes happens, that should not happen, and the lack of cleanliness develop into a problem. Cleaning Innovation then offer you rappid support by sending a team of experts.

The team's goals are to:

1. Identify and find the causes of the problem.
2. Create a proposal for a sustainable solution.
3. Establish an action plan to implement the solution.
4. Monitor and assess the impact of the solution.

The team is put together as needed out of a number of experts in various fields such as: Microbiology, Food Technology, Surface and Colloid Chemistry, Measurement, Analytical Chemistry, Environmental Science, Food Chemistry, Hygiene Technology, Sensors, Process Engineering and Hygienic design.
